USING A MESOPOROUS CARBON
MATERIAL AS A NEGATIVE
ELECTRODE

DECISION ON
DECLARATION UNDER
37 CFR 1.497(a)

This is a decision on applicants' Response to Notification of Missing Requirements under 35 U.S.C. 371 in the United States Designated/Elected Office filed on 09 August 2007 in the United States Patent and Trademark Office (USPTO) along with a request for a one month extension of time, which is granted.

On 14 May 2007, a Notification of Missing Requirements (Form DO/EO/905) was mailed to applicant, indicating that the oath or declaration was not executed in accordance with either 37 CFR 1.66 or 1.68 and drawing applicant's attention to the fact that the second inventor's name Nagura did not correspond with the name Nakura listed on the published international application.

On 09 August 2007, applicant filed a reply to Notification with a statement of counsel explaining the error. Applicant filed an explanation that the difference in the second inventor's name is a spelling error. The correct spelling of the second inventor's name is Satoshi NAGURA. Applicants' explanation is accepted and noted for the record.

For the reasons above, the Request is **GRANTED**. No petition fee is required. The declaration of inventors submitted by applicants on 24 January 2007 is acceptable.

The application will be forward to the United States Designated/Elected Office for further processing. The 35 U.S.C. 371(c)(1), (c)(2) and (c)(4) date is 24 January 2007.
